

Case Study

Client- City Build

Location- Old Trafford

Overview:

Profire Systems Ltd were contracted to complete fire stopping works by City Build (Manchester) Ltd on the refurbished 'green room' in Old Trafford.

The project length was very limited and had to be completed in a very short timescale whilst working around several other contractors. This project was completed on time with all compliance and quality documents received by the client promptly as per the specifics of this contract.

This project had very tight security surrounding the site and there were several security checks before access was granted to site.
